

UNIQUE
GARDEN SOLUTIONS

“We believes that safety should be first priority for any company because life of any person is priceless. And keeping this in mind we work with the aim of “Zero Harm”.”

India is expected to be the fastest growing economy in the world over the next few years. Extrapolating the experience of the last decade or so, this growth is going to be accompanied by the creation of higher quality, more integrated, high-tech workplaces and facilities that will include Office Spaces, IT Parks, Residential Townships, Educational Institutes, Manufacturing Units, Hotels, and Hospitals etc across the country. This will create an acute demand for having organizational competency to maintain these premises in a systemic and integrated manner to enhance the well-being, motivation and productivity of the users. Focus on profitability along with a growing preference to concentrate on core activities has been the key driver for organizations to outsource their non-core activities to other service providers. There has been a growing realization amongst clients about the long-term value that a professionally managed IFMS provider like UGS brings to the forefront while managing their non-core activities.

“We committed to deliver quality in whatever we think and do, and to establish quality as the most important parameter in all aspects of its services.”
